Inverter Generators

Westinghouse digital inverter generators offer you the ultimate in portable power convenience. Lightweight, fuel efficient and quiet, their mains-quality electrical output can safely power all your sensitive electronic equipment.

The range includes Professional Series models that provide the highest levels of safety and portability in compliance with Australian WH&S regulations by incorporating an RCD safety switch and weatherproof outlets to protect against electric shock.

There are also Auto Start Series models to complement off-grid solar power systems and other applications that require a hardwired remote-control generator with 2-wire automatic remote start, run and stop control system.

Westinghouse offers 15 different inverter generators from 1,250 to 10,000 Watts maximum electrical output, which is the largest range of any single brand in Australia, to better help you find the ideal solution for your portable power requirements.

Traditional Generators

SINE WAVE OUTPUT
AVR EQUIPPED

Westinghouse open-frame traditional generators have been designed from the ground up to meet the demanding operating conditions and safety regulations unique to Australia. The range covers maximum electrical power outputs from 3,750 to 8,500 Watts and all models are powered by advanced 4-stroke petrol engines to ensure high fuel efficiency and low noise operation.

The Utility Series models are compact, high-performance units equipped with all the essential features that users expect today.

For the enhanced user protection offered by an RCD safety switch and weatherproof 240 Volt outlets, the Westinghouse Professional Series has got you covered.

The Auto Start Series model features a 2-wire automatic remote start, run and stop control system and low THD alternator that's fully compatible with off-grid solar power systems.
